MULTI DISPLAY

Reusable, adaptable and practical

Multi Display

Reusable, adaptable and practical

The modular Multi Display is reusable, and is guaranteed to last at least 3 years. You profit from maximum flexibility for your product presentations, which will always be perfectly in keeping with your product, campaign and the retail environment.

Sustainable solution

The Multi Display not only saves you costs, but also 90% less cardboard than a standard cardboard display. Together with a reduction in transport, this represents a CO₂ saving of up to 90%.

The Multi Display is made from ABS, 100% recyclable. Thanks to the compact, easy-to-send decoration set, you keep your display up-to-date with all your latest campaigns, while only using a minimum of paper.

Smart components

Endless opportunities for product presentation, such as horizontal or sloping shelves, bottle hooks, cabinet space, wire baskets, LED lighting and (interactive) screens.

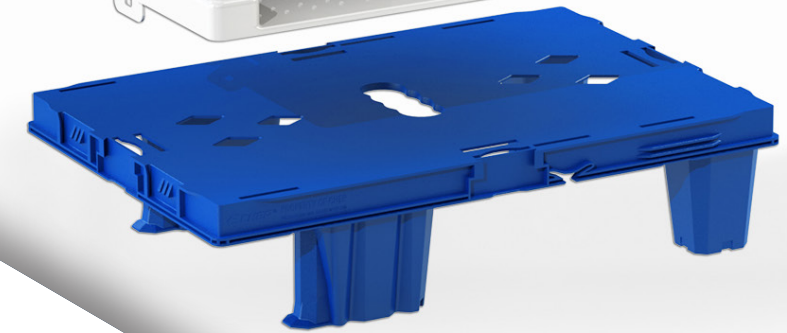

- Only 4 basic components to put the structure together, less than 3 minutes required to rebuild or dismantle the display.
- Compact to send and easily stored

Look & feel of your choice

Decorative side panels, top card and shelf strips can be fully tailored and are simple to switch.

NEW!

CHEP dolly

NEW

The first permanent display with a injection molded lock for CHEP dolly or pallet. The display is sturdily and easily connected with a single click. Your advantage lies in time, materials and logistic simplicity.

We will be pleased to advise you.

Cost savings

The Multi Display is attractively priced and gives a quick return on investment, thanks to simple and inexpensive switching of promotion materials.

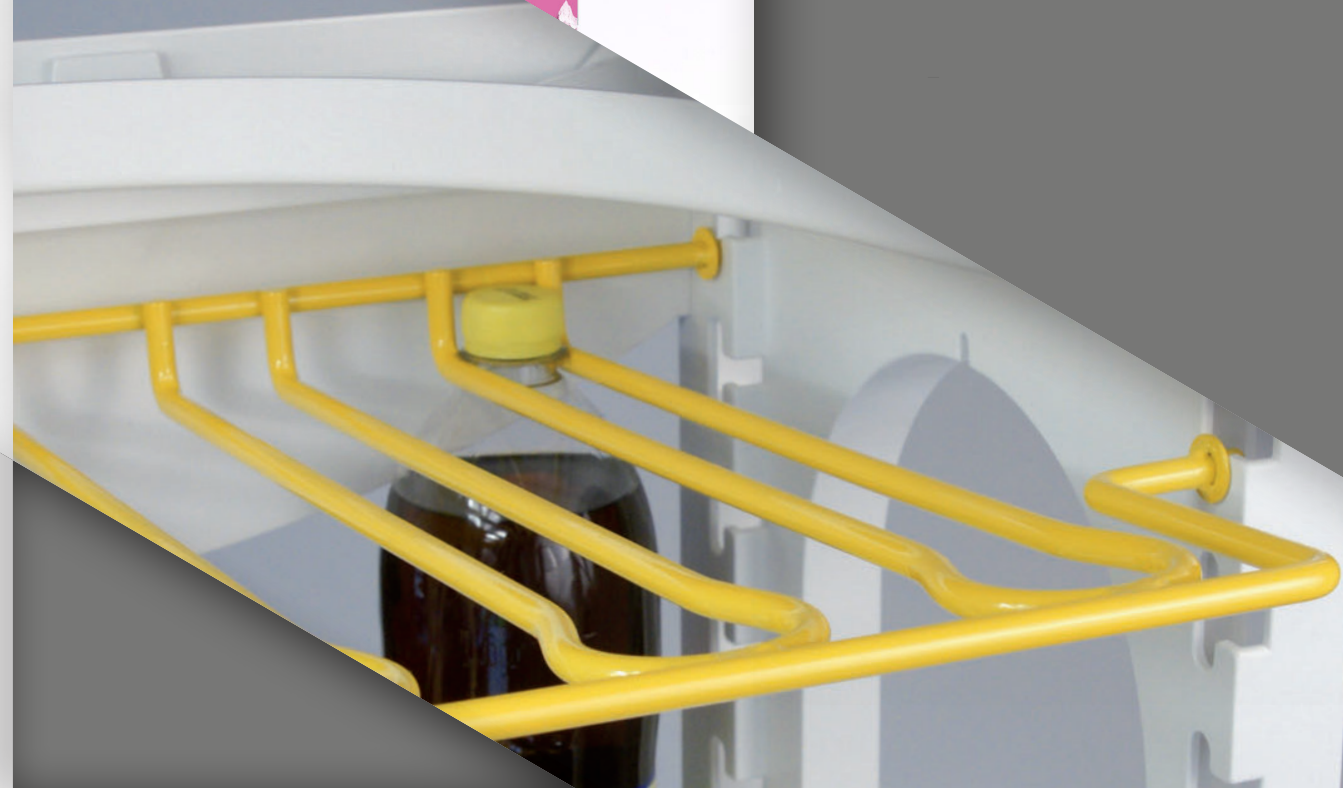

Specifications:

- In place: 59 x 39 x (100, 150 or 200) cm
